

High-speed Spectral Acquisition with Advanced Signal-to-Noise Performance

The SR2 spectrometer is a versatile spectrometer that provides high-speed spectral acquisition and delivers best-in-class signal-to-noise ratio (SNR) performance. The SR2 spectrometer is ideally suited for applications including laser characterization, plasma monitoring, and absorbance measurements that benefit from the

instrument's high SNR performance (25800:1 maximum SNR per second w/High Speed Averaging Mode). The SR2's combination of speed (integration times to 1 µs) and SNR provides application versatility without the trade-offs typical of comparable spectrometers.

At a Glance

length range: ~190-1050 nm (configurations available within this range)

esolution (w/25 µm slit): 0.43-2.0 nm (FWHM) (configuration-dependent)

gration time: 1 µs-2 s

mamic range: 3400:1 (single scan)

380:1

ermal wavelength drift: 0.02 nm/° C

Interfaces: USB Type-C; SMA; 16-pin

Samtec TM; RS-232

nperature (storage): -30 °C to 70 °C

nperature (operation): 0 °C to 55 °C

nensions: 89.0 mm x 63.5 mm x 31.3 mm

iaht: 275 g

SR2 Offers Great Versatility

The SR2 is highly configurable and is produced using industryleading manufacturing techniques, ensuring excellent thermal stability and low unit-to-unit variation. Preconfigured models are available with entrance slits in widths of 5 µm to 200 µm, providing users with a range of optical resolution (FWHM) and signal-throughput options to meet various requirements. The SR2 spectrometer is compact and remarkably versatile, and is compatible with Ocean Optics light sources, accessories and OceanView software, allowing users to optimize setups for different applications.

Software Developers Kit Adds Value

Each SR2 spectrometer comes with OceanDirect, a powerful, cross-platform Software Developers Kit (SDK) with an Application Programming Interface (API). With its library of functions, OceanDirect provides users the capability to optimize spectrometer performance and access critical data for analysis.

Also, SNR can be dramatically enhanced using the High Speed Averaging Mode available in OceanDirect. Visit our website for details.
